READING PASSAGE 1

You should spend about 15 minutes on Questions 1-10, which are based on Reading Passage 1.

Any type of regular, physical activity can improve your fitness and your health. The most important thing is that you keep moving. Exercise should be a regular part of your day, like brushing your teeth, eating, and sleeping. It can be in gym class, joining a sports team, or working out on your own. When you are ready for regular exercise, keep the following tips in mind

First, a good mental attitude is important, as stay positive and have fun. Let's start by finding an activity that is fun. You are more likely to keep with it if you choose something you like. A lot of people find it more fun to exercise with someone else, so see if you can find a friend or family member to be active with you.

Second, take it one step at a time. Small changes can add up to better fitness. For example, walk or ride your bike to school or to a friend's house instead of getting a ride. Get on or off the bus several blocks away and walk the rest of the way. Use the stairs instead of taking the elevator or escalator

Third, get your heart pumping. Whatever you choose, make sure it includes an aerobic activity that makes you breathe harder and increases your heart rate. This is the best type of exercise because it increases your fitness level and makes your heart and lungs work better. It also burns off body fat. Examples of aerobic activities are basketball, running or swimming

Last, don't forget to warm up with some easy exercises or mild stretching before you do any physical activity. This warms your muscles up and may help protect against injury. Stretching makes your muscles and joints more flexible, too. It is also important to stretch out after you exercise to cool down your muscles

To conclude your goal should be to do some types of exercise every day. It is best to do some kinds of aerobic activities without stopping for at least 20 to 30 minutes each time. Do the activity as often as possible but don't exercise to the point of pain.
